## At this level...

At Level 3, candidates are required to identify and use relevant understanding, methods and skills to complete tasks and address problems. When tackling problems, this include analysing the situation to be clear about the problem and exploring ways to resolve it.

Although the problem and context should be clearly defined, a measure of complexity should be reflected in the demand of the problem, the time frame in which the problem is to be tackled and the way in which relative success is analysed. Candidates will exercise autonomy and judgment when making decisions about approaches and resources, and when reviewing and revising their plan.

At Level 3, candidates are required to identify and use relevant understanding, methods and skills to complete tasks and address problems. When developing and demonstrating skills in presenting information for different purposes, this includes evaluating their own and others' strengths and weaknesses; planning how to improve their presentation skills; giving feedback; and using feedback to monitor their progress and make changes as needed.

Although a candidate's targets should be clearly defined, a measure of complexity should be reflected both in the demand of the activities the candidate undertakes to decide on the targets, and in the range of activities they engage in to develop their skills when preparing for and practising the presentations. Candidates will exercise autonomy and judgment when making decisions about activities to improve their presentation skills, and when responding to feedback. Candidates need to be aware of different approaches both in terms of presentation styles and of ways to manage their own development.
